

On the MP4 file, the “Comments” field is blank and no “date taken” value (even though the XMP values have been changed)

```
D:\Projects\_DeleteMe-Test>exiftool -a -g1 -alldates 19920618-[DPDHi8]_Test.mp4

---- QuickTime ----
Create Date           : 1992:06:18 12:34:56
Modify Date           : 1992:06:18 12:34:56
---- XMP-exif ----
Date/Time Original     : 1992:06:18 12:34:56
---- XMP-xmp ----
Create Date           : 1992:06:18 12:34:56
Modify Date           : 1992:06:18 12:34:56
```

Is there a “date taken” tag for MP4 that is different than for JPG files?

But on JPG files, both the “comments” and “date taken” tags have values.

Note: The Windows date for the JPG files matches the “date taken” date. But the MP4 date is the date the Windows file was created.

Name	Date	Type	Size	Length
19920618-[DPDHi8]_Test.mp4	01/10/2016 02:16 PM	MP4 File	248,552 KB	00:04:08
19920620-M&T_Test.jpg	06/20/1992 12:34 PM	JPEG image	2,552 KB
